RECOMMENDATION FILTERING TECHNIQUES :

The selection of an effective and accurate filtering technique is crucial for developing a successful recommendation system. These are four widely used recommendation filtering techniques to build-up the architectures of the recommendation.

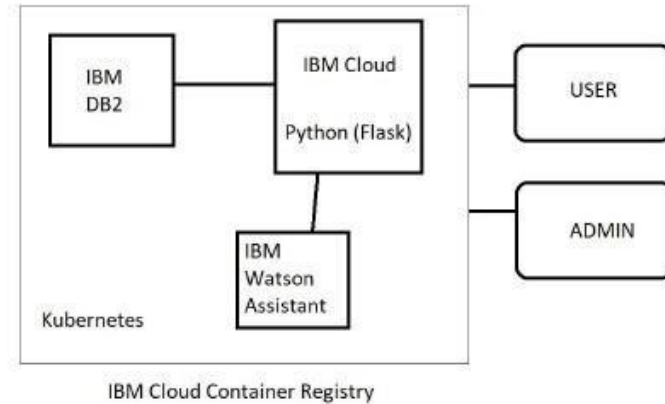

- ✦ Content-Based Filtering (CBF) Technique
- ✦ Collaborative Filtering (CF) Technique
- ✦ Hybrid Filtering Technique
- ✦ Hyper personalization Filtering Technique

TEAM ID _ PNT2022TMID19425

IBM SOLUTION ARCHITECTURE :

Recommendation systems have the potential to explore new opportunities for retailers by enabling them to provide customized recommendations to consumers based on information retrieved from the Internet.

Solution Architecture:

The successful outcome of the recommendation system depends on the relevance of the filtering technique and its compatibility with the proposed model.
